

Treatment and Prevention of COVID-19 for High-Risk Persons

Did you just test positive for COVID-19?

Treatment is available for *persons 28 days and older* who have symptoms and are at *high risk for severe disease*, even if they have been vaccinated. The blue box below lists some of the reasons a person may be at high risk. Talk with a healthcare provider to find out if treatment is right for

NOTE: Age and weight requirements may be different for each treatment.

- **Recently tested positive for COVID-19** and are **experiencing mild to moderate COVID-19 symptoms, AND**
- Have **one or more of the following risk factors** for severe disease, hospitalization or death:
 - Obesity or overweight
 - Older age (65 years and older)
 - Pregnancy, diabetes, chronic kidney disease, weakened immune system, mental health conditions, heart disease, high blood pressure and certain lung diseases, such as COPD and moderate/severe asthma
 - Other medical conditions/factors, including race/ethnicity, that may place patients at higher risk
 - Black/African American, Hispanic/Latino/a/Latinx, other persons of color should speak to their medical provider
 - See the CDC website for a full list: [People with Certain Medical Conditions | CDC](#)

Do you have a weakened immune system?

If you do *not* have COVID-19 and have *not* been exposed to COVID-19, you may be able to get Evusheld to help prevent infection. You may also be able to get it if you cannot be vaccinated. Talk with a healthcare provider to find out if Evusheld is right for you.

Where can I go for treatment?

- Test-to-Treat sites: See [COVID-19 Test to Treat Locator English \(arcgis.com\)](#)
- Your healthcare provider/system, community clinics, retail pharmacies.
- For treatments that require an IV or an injection, some patients may be referred by a healthcare provider to an infusion center.
- You can also complete a self-referral form for monoclonal antibody therapy, which is one type of treatment, at the links below:
 - **Total Infusion:** <https://totalinfusion.com/make-a-referral/>
 - **UCSF:** [UCSF External Self or Provider Referral for COVID-19 Monoclonal Antibody Outpatient Treatment \(PDF\)](#)
 - **Stanford Medical Center, Palo Alto:** Contact DL-SHC-Pharmacy-COVID@stanfordhealthcare.org or call (650) 391-8503. [COVID-19 Monoclonal Antibody Therapies - Patients | Stanford Health Care](#)
