Letter to Employers

Nicholas J. Moss MD Mi MPH

Alameda County Public Health Department (ACPHD) has been working closely with the Alameda County Health Care Services Agency (ACHCSA) to provide up-to-date information on COVID-19 prevention and response measures. ACHCSA has developed a new isolation and quarantine protocol to help ensure the safety of employees and the public.

The new protocol includes:

- Employees who have been exposed to COVID-19 must isolate for 14 days or until they receive a negative test result.
- Employees with symptoms of COVID-19 must quarantine for 10 days or until they receive a negative test result.
- Employees who have tested positive for COVID-19 must isolate for 10 days or until they receive a negative test result.

ACPHD recommends that employers:

- Encourage employees to stay home if they are feeling sick.
- Provide sick leave for employees who are unable to work due to illness.
- Ensure that employees who are isolating or quarantining are not put at risk of losing their job.

ACPHD also recommends that employers:

- Provide clear and consistent communication to employees about their rights and responsibilities during the COVID-19 pandemic.
- Ensure that employees have access to personal protective equipment (PPE) and other necessary resources.
- Conduct regular health and safety training for employees.

ACPHD will continue to work with ACHCSA and other health officials to provide the latest information and guidance on COVID-19.

Kimi Watkins, Director

Nicholas Moss, MD, Health Officer
