Notes and disclaimers: The data for totals and individual SNFs come directly from the California Department of Public Health. The State alone is responsible for the data, its maintenance, and accuracy. The County only provides this data as a resource, but does not, and cannot, confirm or guarantee the accuracy of the data.

Per the State of California, case and death counts are provisional and may change as facilities correct or add data. Cumulative deaths are for both positive cases and suspected cases.

Per the State, COVID-19 fatalities include deaths that were reported by facilities to the best of their knowledge. These include deaths that occurred at nursing homes and those that occurred in other locations, such as a hospital or private home, if the death occurred within the 14-day bed hold period after the resident transferred from the SNF. Deaths that occurred outside of this 14-day period may not be captured. Some of these deaths may include residents who had COVID-19, but died of something else. Given these complexities, fatality totals may not exactly match other data sources or, in some instances, the death may be double counted in more than one data source such as county-level fatality totals. All data are provided to offer a snapshot of COVID-19 and does not imply wrongdoing on the part of the facility. Please contact the State for more clarification or information.

Per the State, the most recent record for Valley Memorial Hospital DP SNF-Livermore is from 6/27.
State Updates

• Variance Attestation
• County Data Monitoring
• Sector Reclosing
Key State COVID-19 Reopening Terms

Variance Attestation

• Health Officer attests to meeting local COVID-19 indicators and sufficient readiness to move ahead in the Resilience Roadmap

• Allows – but does not require – further sector reopening

• Provides flexibility to allow activities that the Health Officer determines are lower risk for our community

• 56 counties have an approved variance

• Alameda and Imperial only remaining non-variance counties

County Data Monitoring List

• Identifies counties that are not meeting statewide indicator benchmarks (case rates, hospitalizations, hospital capacity)

• Different but related indicators than required for variance attestation

• Counties may be required to reclose or restrict previously open sectors

• Alameda County and 30 other counties are on the list
Variance Attestation and Monitoring List: Alameda County’s Current Status

Variance Attestation

• HCSA is drafting our variance attestation application
• Though case rates are increasing, (resulting in placement on the Monitoring List), other indicators are sufficiently stable to enable us to apply
• Required Board of Supervisors letter of support is on your agenda for consideration today

County Data Monitoring List

• On Sunday, 7/12, Alameda County was added to the State’s County Data Monitoring List
• Alameda County was placed on the list due to increases in new COVID-19 cases in recent weeks
Governor Announces Additional Sector Closures

On July 13, Governor Newsom announced a “dimming” of prior sector reopenings

1. **Statewide**, closing the following activities:
   - Dine-in Restaurants (indoor)
   - Wineries and Tasting Rooms (indoor)
   - Movie Theater (indoor)
   - Family Entertainment Centers (indoors)
   - Zoos and Museums (indoors)
   - Cardrooms (indoors)
   - Brewpubs, breweries, bars, and pubs (indoors and outdoors)

2. For **30+ counties on the Monitoring List >3 days** (includes Alameda County as of 7/15), closing the following *indoor* activities unless they can be modified to operate outside:
   - Gyms and Fitness Centers
   - Hair Salons and Barbershops
   - Indoor Worship Services
   - Malls
   - Offices for Non-Critical Infrastructure Sectors
   - Indoor Protests
   - Personal Care Services (incl. nail salons, massage parlors, and tattoo parlors)
Recently Issued State Guidance on Outdoor Dining

• On July 9, the State issued updated guidance prohibiting outdoor dining in counties without variance attestation
• Alameda County’s original decision to permit outdoor dining was based on the Health Officer’s assessment that outdoor activities, with appropriate protective measures, carry less risk than indoor activities
• At that time, the State did not differentiate dining guidance by indoor/outdoor as it now does
• Until and unless Alameda County receives approval for variance attestation, restaurants in Alameda County may only be open for drive-through or pickup/delivery options
Variance Attestation and Monitoring List: Impact of Recent State Actions on Alameda County

Variance Attestation

• Should your Board approve the letter of support today, HCSA will submit Alameda County’s variance attestation

• Should the State provide timely approval of our application:
  • We would be able to allow the Oakland Zoo to open for outdoor activities with appropriate safety measures in place
  • Outdoor dining would be able to resume

County Data Monitoring List

• In accordance with State’s directive:
  • Places of worship would have to hold only outdoor services
  • Indoor malls would be required to close

• Other restrictions are not likely to have an impact in our county as they apply to sectors not already open
### Variance Attestation Readiness Criteria

Variance Attestation Considerations and Next Steps

- Variance attestation will give us **more flexibility** and the option to better coordinate with our neighbors if and when the time is right.

- Approval of a variance **does not automatically open additional sectors**.

- **We can – and plan to – remain paused on broader reopenings at this time**, whether we or not we receive a variance.
Questions & Discussion
Variance Attestation
State Resilience Roadmap: Allowable Activities

Without Attestation

• Auto dealerships
• Childcare
• Construction
• Day camps
• Delivery services
• Food packing
• Logistics and warehousing
• Manufacturing
• Outdoor museums
• Places of worship
• Ports
• Professional sports (w/out live audiences)
• Public transit
• Real estate transactions
• Retail/shopping centers

Requiring Attestation
(*subject to Monitoring List restrictions)

• Campgrounds and outdoor recreation
• Cardrooms*
• Casinos
• Dine-in restaurants*
• Family entertainment centers (for example: bowling alleys, miniature golf, batting cages, and arcades)*
• Gyms and fitness centers
• Hair salons and barbershops
• Hotels (for tourism and individual travel)
• Movie theaters*
• Personal care services (nail salons, tattoo parlors, body waxing)
• Restaurants, wineries, and bars
• Wineries and tasting rooms*
• Zoos and museums*

</table>

Data Last Updated: Jul 12 2020 5:45PM
Hospitalizations of COVID+ San Quentin Inmates (as of 7/11/20)

• 72 total patients hospitalized in 5 counties
  • 3 for conditions other than COVID
  • 21 ICU

• 9 patients hospitalized in Alameda County
  • 8 at Alameda Health System
  • 4 ICU
Residents Returning from CDCR

3,500 releasees announced
• 57 early-release probationers expected July 1-December 31, 2020
• ~25 natural release parolees expected per month

Additional 4,500 releasees announced last week
• Still awaiting additional detail

• Alameda County health officer blanket isolation & quarantine orders require isolation and quarantine for COVID+ and exposed.
• Given the extent and nature of the prison COVID-19 outbreaks, Alameda County is considering any person returning from a facility with prisoner cases exposed.
• For CDCR, this means 14-day quarantine for all residents returning from a facility with an outbreak regardless of COVID test results.
Residents Returning from CDCR

• Though the specifics are unclear and changing, here is what we understand from CDCR as of now:
  • All prisoners are being tested prior to release
    • A positive test does not preclude release
    • Release occurs no later than 7 days post-test
  • Housing verification is not required for release
  • Local Public Health Departments will be notified of all returning residents from San Quentin and only those with positive tests from other facilities
  • Returning residents are provided with isolation or quarantine instructions upon release, as medically indicated
  • All returning residents from San Quentin are being offered Project Hope hotel rooms
  • Returning residents from other facilities will be offered Project Hope hotel rooms only if they are COVID+ or need to complete a medically ordered quarantine post-release
  • Acceptance of Project Hope hotel rooms is not a condition of release
First Round of Early-release Probationers

• 57 early-release probationers expected between now and 12/31/20
• HCSA and Probation have been working together to ensure smooth transition for early-release probationers
• Early-release probationers will isolate/quarantine at Operation Comfort
• Transportation will be provided by Probation
• Probation is offering incentives to comply with isolation/quarantine orders:
  • Smart phone
  • Tablet
  • Gift card for food
  • 14-day reduction in probation supervision
• Currently 18 early-release probationers residing at Operation Comfort
Natural Release Parolees

• ~25 natural release parolees expected per month
• Concerns about CDCR coordination of parolee releases
• HCSA and Probation sent a joint letter to the State outlining several outstanding questions and offering recommendations, including:
  • Establish a Project Hope facility in Alameda County with onsite wraparound services and supervision with sufficient capacity to receive all returning Parolee residents.
  • Issue a State Health Officer Order requiring isolation and quarantine in a Project Hope location for every parolee being from a prison with an outbreak.
  • Establish an incentive program, up to and including reduced parole supervision terms of 14 days.
  • Provide transportation from prison to Project Hope.
Next Steps on Coordination for Returning Residents

- CDCR and CDPH convening subgroup of select county health executives for planning and coordination
- Dr. Clanon and Chief Still representing Alameda County
