

## TESTING RESOURCES

### EMPLOYEE TESTING

To meet the requirement for employee testing, employees can arrange for a COVID test with their own healthcare providers, or through the [ACPHD community testing sites](https://covid-19.acgov.org/testing.page?#Community) (<https://covid-19.acgov.org/testing.page?#Community>). ACPHD community testing sites are free and offered at various locations and times. Please check the website for the latest information. The [California State Testing Website](https://www.arcgis.com/apps/Nearby/index.html?appid=43118dc0d5d348d8ab20a81967a15401) (<https://www.arcgis.com/apps/Nearby/index.html?appid=43118dc0d5d348d8ab20a81967a15401>) may have information on additional testing sites.

### RESIDENT TESTING

Residents may require a COVID test, but not all residents may be able to leave the facility to receive a test. ACPHD encourages facilities to have a relationship with a laboratory that can assist with testing. The California Coronavirus COVID-19 Testing Task Force has a [Lab List](https://testing.covid19.ca.gov/covid-19-testing-task-force-laboratory-list/) (<https://testing.covid19.ca.gov/covid-19-testing-task-force-laboratory-list/>) with information about laboratories that can provide COVID-19 testing. The laboratories on this list vary in the types of services they can provide: some labs can come onsite to do sample collection, some provide sample collection kits, and others may receive specimens to run the diagnostic test. Please refer to the list to find a laboratory and inquire about the services you may need for your facility.

The following is a list of labs that ACPHD has been informed have the capacity for testing. Check the California State Testing Task Force [Lab List](#) for more details, including service capabilities, specimen types, test turnaround time, and payors billed:
