

When Choosing a COVID-19 Testing Site

L.E.S.S. is More

Alameda County has seen a rise in unauthorized testing sites. Be informed when deciding on your options for COVID-19 testing. Alameda County recommends going to a testing site that is Legal, Ethical, Secure, and Safe (L.E.S.S.)

Make sure the site you choose is:

Legal

Test kits have received FDA emergency use authorization. Testing sites do not need your social security number or immigration status.

Ethical

Your test should be free, affordable or billable to insurance. Any additional cost should be clearly explained.

Secure

Staff wear medical grade protective equipment. Gloves are worn and changed in-between clients. Testing staff implements COVID-19 safety protocols including distancing.

Safe

Testing site and lab information are available, and you should know how your personal information will be used.

For free reliable community testing please visit:
