WHAT TO EXPECT IF YOUR TEST IS POSITIVE?

If you test positive and have symptoms: Follow the isolation guidance. Stay home and away from others until at least 10 days have passed after you first became ill AND at least 1 day after you no longer have a fever AND your symptoms (cough, shortness of breath) have improved.

If you test positive and never develop symptoms: Stay home and away from others and monitor yourself for symptoms for 10 days. If no symptoms develop in 10 days, you may end isolation on day 11.

Seek emergency medical care immediately if you have emergency warning signs for COVID-19:
- Trouble breathing
- Persistent pain or pressure in your chest
- New confusion
- Inability to wake or stay awake
- Bluish lips or face
