

# THREE REASONS TO GET YOUR CHILD VACCINATED

## COVID-19 Vaccines:

1. Are **safe** and **effective** at preventing illness and protecting against the most serious impacts of this disease.

2. **Protect** others from COVID-19, including vulnerable family and community members.

3. Are **mandated** by the State of California. This means K-12 students will need to be vaccinated to attend school once vaccines receive full FDA approval.

# STILL HAVE QUESTIONS?

Scan the QR code to learn more about COVID-19 vaccines.

Talk to your child's pediatrician if you have questions or concerns specific to their health history
